

The 2026 Winter Olympics medals

Gold medal

Value: \$1,938 / £1,437

Ag

Silver

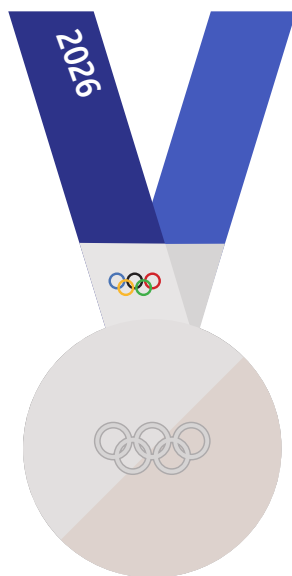

500 g

Au

Gold

6 g

The gold medal is mostly silver, with a plated layer of gold on top.

Silver medal

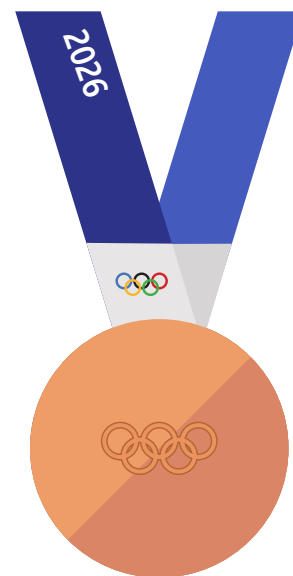

Value: \$1,003 / £744

Ag

Silver

500 g

The silver in this year's medals has a purity of 99.9%. All of this year's medals are made from recycled metals from the Italian State Mint. An unspecified protective coating protects the medals from corrosion.

Bronze medal

Value: \$5.13 / £3.81

Cu

Copper

420 g

Copper is the only metal specified for the bronze medal, though other metals are likely present in small quantities. Traditionally, bronze contains tin, though previous Olympic bronze medals have included zinc.

Estimated medal values in dollars via [oxfordeconomics.com](https://www.oxfordeconomics.com). \$ to £ exchange rate for February 2026 used for values in pounds sterling.
